Timeless Designs

INSPIRING DESIGN, LANDMARK STRUCTURES, LASTING FORMS.

Zenachi takes architectural concrete beyond a building material and turns it into a powerful design element that defines the identity of a space. Shaped by the balance of geometry, texture and light, every piece is the shared product of contemporary design thinking, precise engineering and master craftsmanship. The modular solutions we develop for interior and exterior spaces unite timeless aesthetics with durability and functionality.

OUR MISSION AND APPROACH

Why Zenachi?

FORMS THAT INSPIRE TRUST BY DESIGN

Raw concrete has a language of its own: pure, strong and calm in the face of time. At Zenachi, we give this language new forms without changing it. Geometric shapes let light travel across surfaces and shadows add depth to the space. The result is not just a building element, but designs that connect with their setting and, over time, become part of it.

SOLUTIONS BUILT ON GEOMETRY

We developed the ZenBlock Series so that a design idea can come to life without being lost along the way. Precision-made modular precast wall elements let architects and designers work freely at any scale. Each module is part of a simple, reliable system in which technical requirements and aesthetic integrity are considered together.

UNCOMPROMISING, TIMELESS QUALITY

Our production process combines craftsmanship rooted in a deep knowledge of the material with contemporary concrete technology. A piece is not considered finished when it leaves the mold; its surface, texture and details are perfected by hand. From Quadro to Luma, from Marrakesh to Tria, every design is made to withstand varying conditions and to live with its space for many years.

SUSTAINABILITY AND TRANSPARENCY

When choosing materials, we care as much about the footprint our production leaves on nature as about the product itself. In our blends of natural minerals, sand and cement, we favor eco-friendly raw materials and run a traceable, transparent production system that uses resources efficiently. With long-lasting, recyclable concrete elements, we embrace a way of production more in balance with nature.

AERO

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

The AERO series brings together the elegance and functionality of natural concrete, adding a modern, industrial touch to your spaces.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

FLOWER

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

The FLOWER series unites the durability of natural concrete with the graceful geometry of a flower form. Its openwork structure balances light and shadow, creating airy surfaces full of character in both interior and exterior spaces.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

FRAME

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

The FRAME series pairs the noble texture of concrete with a geometric order, giving your spaces a modern, clean and linear character. With sharp lines and an openwork structure that creates a sense of depth, it captures light and shadow like a frame, setting the pure rhythm of modern architecture on your walls.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

MARRAKESH

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

The MARRAKESH series pairs the raw texture of concrete with timeless geometry, bringing an exotic breeze and sculptural depth to your spaces. It reinterprets the perforated-wall tradition of Mediterranean and North African architecture with modern lines, filtering sunlight to create striking plays of shadow and a continuous flow of air.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

MEXICO

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

The MEXICO series pairs the noble texture of concrete with a rhythmic geometry, giving spaces a distinctive identity and sculptural depth. It reinterprets iconic influences of Central American architecture with modern lines, filtering sunlight into striking plays of shadow while its openwork structure allows natural airflow.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

SUNWAVE

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 7 KG

Concrete at its most dynamic: SUNWAVE. Its parametric, fluid form lifts walls out of the ordinary and turns them into living architectural elements. As the light changes, so does the shadow; as the shadow changes, the soul of the space is reshaped.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

VESTA

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 30 X 30 X 7 CM

WEIGHT : 8.5 KG

One of concrete's most rational and powerful forms: VESTA brings timeless character to spaces with its clean geometry and deep surface facets. It is an indispensable focal point for projects seeking a strong architectural identity and striking plays of shadow.

Thickness may vary by 2-3 mm in accordance with TSE standards.

ACOUSTIC

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 20 X 20 X 6 X 9 CM

WEIGHT : 4.5 KG

The ACOUSTIC series combines the strong character of concrete with acoustic comfort, giving spaces visual rhythm and functional calm. Its geometric openwork structure filters light and shadow, while breaking up sound waves to create more balanced and airy atmospheres.

Thickness may vary by 2-3 mm in accordance with TSE standards.

KAFFO

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 20 X 20 X 9 CM

WEIGHT : 4.5 KG

The KAFFO series pairs the raw texture of concrete with an original geometry, bringing compact dynamism and sculptural depth to spaces. Its 20 × 20 cm modular structure reinterprets the traditional perforated-wall culture with modern lines, filtering light at sharp angles to create striking plays of shadow and natural airflow.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

LUMA

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 20 X 20 X 9 CM

WEIGHT : 4.5 KG

Light finds a new path through raw concrete. With a perforated structure that combines minimalism and futuristic lines, LUMA does more than provide airflow; it creates a kind of 'light circulation'. Using light as a building material, this design reinterprets the conventional notion of boundaries in a transparent, bold language.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

QUADRO

SIZE : 20 X 20 X 9 CM

WEIGHT : 4.5 KG

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

The QUADRO series combines the unshakable strength of concrete with a four-way balance, giving spaces flawless symmetry and rational depth. Its 20 × 20 cm modular structure brings the industrial character of raw concrete into an orderly geometry. Its openwork surface, where vertical and horizontal lines intersect, creates balanced plays of shadow and natural airflow.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

TRIA

Ventilation Feature

Indoor & Outdoor Suitable

Various Color Options

SIZE : 20 X 20 X 9 CM

WEIGHT : 4.5 KG

The TRIA series brings the dynamic character of triangular geometry together with the pure texture of concrete. Its 20 × 20 cm modular structure allows rhythmic surfaces to be built in different arrangements, filtering light at sharp angles to create distinct plays of shadow and natural airflow.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

SOLID

Indoor & Outdoor Suitable

Various Color Options

SIZE : 20 X 20 X 9 CM

WEIGHT : 5 KG

With its solid surface and clean geometry, the SOLID series gives spaces a strong, unified character. Its 20 × 20 cm modular structure is designed for applications that require privacy, surface continuity and rhythmic composition. In different arrangements, it creates modern, sculptural wall surfaces.

Thickness can be customized from 3 to 11 cm on request.
Thickness may vary by 2-3 mm in accordance with TSE standards.

FOR CORNERS

BREEZE RADIUS

SIZE : 30 X 7 X 7 CM

WEIGHT : 2 KG

Seamless Aesthetics at Corners

Architectural integrity lies in the details. BREEZE RADIUS provides an elegant transition at the corner joints of decorative concrete wall designs without interrupting the form. Its flowing lines and minimalist structure give room-divider panels a refined finish.

FOR CORNERS

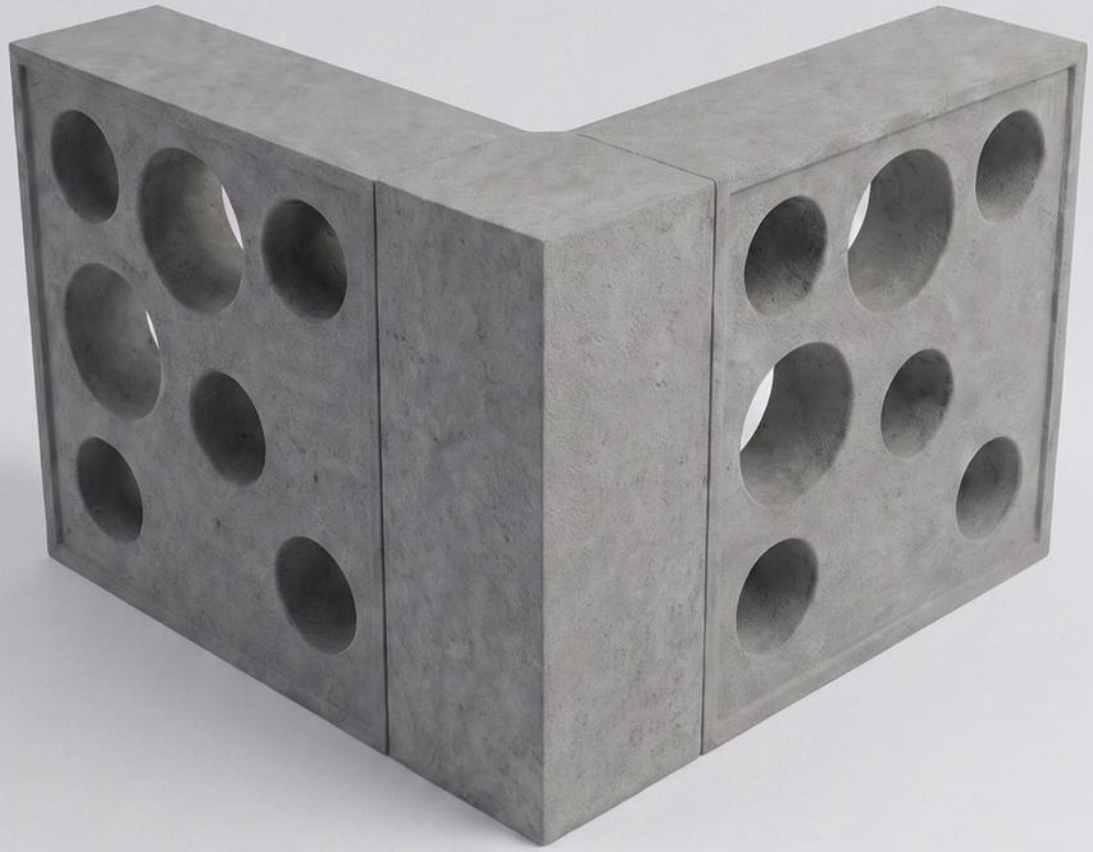
BREEZE SQUARE

SIZE : 30 X 7 X 7 CM

WEIGHT : 2 KG

Seamless Aesthetics at Corners

Architectural integrity lies in the details. BREEZE SQUARE provides a balanced, crisp transition at the corner joints of decorative concrete wall designs without interrupting the form. Its angular lines and minimalist structure give room-divider panels a refined finish.



Every Zenachi design is proof of the raw beauty and versatility of concrete. Carefully selected, from base tones to special architectural surfaces, our palettes are designed to achieve perfect harmony with one another or to create a strong focal point. Discover the timeless interplay of textures and forms, and bring the natural character of concrete to your projects.

FLAWLESS BONDING

Say goodbye to traditional mortar residue with powerful adhesive technology; focus only on design.

ZEN ADHESION BRICKLAYING is designed to preserve the unique aesthetics of Zenachi blocks. Thanks to its clean, fast application, you can complete your projects on time and on budget.

INTERIOR ADHESIVE
(ZEN ADHESION BRICKLAYING)

Fast & Clean Bricklaying Foam

- **High Load-Bearing Capacity**
- **Clean & Aesthetic Finish**
- **Thermal Advantage**
- **Efficient Consumption**

EXTERIOR ADHESIVE (ZEN ADHESION GT)

Mounting Adhesive

ZEN ADHESION GT features next-generation hybrid polymer technology that provides initial grab within 5 seconds for vertical installation of Zenachi architectural panels and breeze blocks, with no mechanical fixing required.

- **Instant Grab (5 sec)**
- **Flexible & Acoustic**
- **Bonds to Any Surface**

Application Method: Apply the product in vertical strips to the cleaned surface or to the back of the block/panel. For even load distribution, run a continuous bead rather than spot-applying. It can be painted over once dry.

Stated times and performance values may vary depending on application conditions. For details, please consult our technical team.

APPLICATION SELECTION MATRIX

Technical Property	Interior Adhesive	Exterior Adhesive
Chemical Base	Polyurethane Foam-Based	Hybrid Polymer-Based
Final Curing Time	24 Hours	24 Hours (2-3 mm / 24 h)
Recommended Use	Breeze Block Wall Laying	Architectural Panels & Edges
Application Method	Applicator Gun / Continuous Bead	Cartridge / Vertical Strips
Surface Compatibility	Porous Concrete, Brick, Aerated Concrete	Metal, Wood, Damp Surfaces
Flexibility / Elasticity	Rigid & Gap-Filling	High Elasticity (Shock-Absorbing)
Color	Light Gray / Champagne	White

For high performance, clean joint lines and long-lasting durability in decorative concrete and breeze block applications, Zenachi recommends the ZEN ADHESION professional installation series. Contact our technical department for detailed consumption rates and application guides.

Thank You for Being Part of Our Story!

Since the day we set out as Zenachi, our goal has been to offer timeless experiences that add value to your living spaces, your style and your moments. We hope that as you browse each page of our catalog, you can feel the effort, care and passion behind it to offer you the very best. Thank you sincerely for joining us on this journey and opening your doors to the world of Zenachi.

Your satisfaction, excitement and feedback are our most valuable guide and our strongest source of motivation, shaping our future collections and designs. Don't forget to share your experiences and your style from your first encounter with our products. The Zenachi family becomes all the more beautiful and meaningful with your presence and energy.

Hoping to meet again with brand-new stories and designs that will accompany you in every moment, and in every detail of which you will find a piece of yourself...

By your side in every moment, with every step.
